

Environmental Policy

At Redpost we are committed to minimising the impact of our activities on the environment, we believe that as a business we are responsible for achieving good environmental practice and operating in a sustainable manner.

We are therefore committed to reducing our environmental impact and continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods. We aim to provide a product range which minimises the environmental impact of both production and distribution.

It is our priority to encourage our customers, suppliers and all business associates to do the same. Not only is this sound commercial sense for all; it is also a matter of delivering on our duty of care towards future generations.

Our policy is to:

- Wholly support and comply with or exceed the requirements of current environmental legislation and codes of practice.
- Continually evaluate our operations, ensuring they are as efficient as possible in order to minimise waste. Waste paper, cardboard, glass, plastic, metal and batteries are all recycled. Wherever possible other waste products are reused otherwise they are responsibly disposed of.
- Use only recycled, recyclable and reusable packaging to ship our products. Packaging received from suppliers is reused wherever possible.
- Minimise energy and water usage in our buildings, vehicles and processes in order to conserve supplies, and minimise our consumption of natural resources, especially where they are non-renewable.
- Comply with relevant RoHS regulations.
- Use no chemicals designated as CMRs, PBT, vPvBs or otherwise included in Annex XIV of the REACH regulations.
- Be registered with an approved WEEE compliance scheme and therefore fulfil our obligations in accordance with the WEEE Regulations 2006
- Be registered as a producer of Industrial Batteries and follow up on commitment to recycle batteries returned from our customers.
- Encourage our staff to use alternative means of transport to and from work and encourage schemes such as car sharing as appropriate.
- As far as possible purchase products and services that do the least damage to the environment and encourage others to do the same.
- Assess the environmental impact of any new processes or products before proceeding to full production.
