REACH Compliance

Dear Customer,

As you know the EU is introducing new regulations on the importation and supply of chemicals. This is known as REACH (Registration Evaluation and Authorisation of Chemicals).

We are pleased to confirm that all chemicals used during the manufacture of, or contained within Redpost equipment are used in quantities under the minimum level requiring registration. Also Redpost uses no chemicals designated as CMRs, PBT, vPvBs or otherwise included in Annex XIV of the REACH regulations.

Therefore all Redpost products are compliant with the REACH legislation; Redpost will continue to review any changes in legislation to ensure that our products remain compliant.

If you have any further questions, please feel free to contact us.

Yours faithfully,

Matthew Aldred
